

Acetate take up machines

Winder

RPC.M

No doubt, COMOLI is, since year, leader on conversion of TAKE UP MACHINES.

The FLAT yarn packages produced on such RPC.M winders are unique.

The conversion of draw-twister to draw-winders, acetate spinning machines which means to change from cops packages to cheese packages, is an installation that since year is giving a lot of advantages from many points of view, quality and economically wise.

COMOLI has sold more that 50.000 units in this field, ranging from fine denier hosiery yarns to high counts tyre cord and industrial applications.

Big size packages up to 15 kg or small size with short strokes for fine counts.

Other optional functions are available, such as yarn length controls, electronic yarn break and quality monitoring.

Technical data

Market segment	ACETATE - PA - PES draw-winding
Wind type	random
Yarn count range	20 ÷ 1500 den
Package per winder	1
Tube dimensions	94 x 104 x 260-290 mm (i.d. x o.d. x l.)
Package shape	cylindrical
Package stroke	223 – 250 mm
Winding speed	1000 m/min
Drive system	friction driven
Traverse system	cam + yarn guide
Speed control	inverter
Doffing system	semi manual
